

## Hit Distance Based on Pitch Speed

Effective\_speed vs. hit\_distance\_sc. Color shows details about pitch\_type. The view is filtered on Exclusions (effective\_speed, hit\_distance\_sc, pitch\_type) and pitch\_type. The Exclusions (effective\_speed, hit\_distance\_sc, pitch\_type) filter keeps 2,340 members. The pitch\_type filter excludes CS and FA.

The only pitch with a positive correlation to distance and velocity is a sweeper - ie, the harder the sweeper, the farther the batter will hit it.
